Open cooling towers

Options and accessories

Sound attenuation

VTL-E cooling towers use **quiet centrifugal fans, but to reduce noise even further, you can** extend your VTL-E cooling tower with sound attenuators at the air intake and discharge points.

For residential areas:

Sound attenuation (HS type)

- Discharge attenuator with vertical baffles
- Intake attenuator with straight baffles

For rural areas:

Heavy sound attenuation (HD type)

- Discharge attenuator with vertical baffles
- Double intake attenuator with straight baffles
