Closed circuit cooling towers

Options and accessories

Sump sweeper piping

A sump sweeper piping system **increases water circulation and agitation in** the basin and is designed to be used in combination with a filtration system. It does all this:

- improves your filtration system performance
- helps improve year-round system hygiene
- requires less cooling tower cleaning
- prevents under deposit corrosion

Sump sweeper piping can be **factory-installed** or **retrofitted** on-site.

Want to install sump sweeper piping on your cooling equipment? Contact your local BAC representative for more information.
