

Blade type

Spare parts guide

Blade type

Counter flow products feature **horizontally** installed blade type eliminators.

Cross flow products feature **vertically** installed blade type eliminators in the coil section.

Benefits

- Maximum drift capture through efficient design
- · Light weight
- Easy to handle, lift and remove for inspection and servicing of water distribution system and heat transfer surface (fill and coil)
- Nested modules to guarantee watertight seam
- Corrosion-free
- Perfect fit: model specific kits
- Certified by Eurovent

We use horizontal blade type eliminators in

Open cooling towers: <u>VXT</u>, <u>VTL-E</u>, <u>RCT</u>, IMT

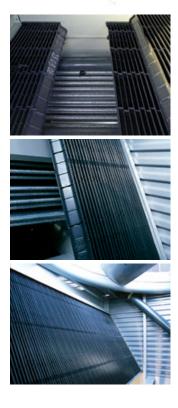

Closed circuit cooling towers: <u>VXI</u>, <u>VFL</u>, <u>HFL</u>, <u>PFE</u>, <u>FXVE</u>

Evaporative condensers: VXC, VCL, PCE, CXVE

We use vertical blade type eliminators in the coil section of

Closed circuit cooling towers: FXV, <u>FXV-D</u>, <u>HXI</u> Evaporative condensers: CXV, <u>CXV-D</u>, <u>HXC</u>
