Sound reduction

Adiabatic cooling

Options and accessories

Sound reduction

We can provide different types of fans to match your specific needs.

Our adiabatic units can be equipped with either low sound or whisper quiet fans, guaranteeing you reduced sound levels.
All sound data is based on actual measurement data taking the full influence of the adiabatic unit into account rather then being based on the sound data supplied by the fan manufacturer (which is for the fans only).

Want to benefit from reduced sound levels? Contact your local BAC representative.
